

Florida's Early Learning System Under Attack!

Tell Legislators to Keep Quality and Accountability in Florida's Early Learning System

Four bills propose sweeping changes to Florida's early learning system. They are:

- PCB BCAS 12-04 by Business & Consumer Affairs Subcommittee
- HB 5103 by Representative Coley
- HB 7055 by Representative Gaetz
- PCB PKAS 12-02 by Prek-12 Appropriations Subcommittee

Contact these bill sponsors and members of these committees today! Together, these bills:

Eliminate provider accountability to ensure educational outcomes for children...

Eliminate funding for school-age child care...

Reduce quality improvement efforts...and

Eliminate community flexibility.

Governors Chiles, Bush, Crist and Scott supported the dual mission of School Readiness: education for children and child care for working parents.

The recent Auditor General's report recognizes Florida's existing School Readiness model is sufficient, and the Auditor General staff testified that Florida's system has served as a **model for other states** ... Deficiencies found by the AG are being fixed right now!

Children need to be ready for school ...

Parents need nurturing, quality care for their children while they work ...

Communities need to provide oversight and require accountability for the programs serving their children ...

Don't let the Legislature take all of this away!

Don't limit quality supports for providers...Support accountability measures for early learning programs

**Urge Florida Legislators to
Oppose These Bills!**
